

## POINT OF SALE (POS) SYSTEM SOLUTIONS

A large part of your business is dependent on the Point of Sale (POS). Not only is it the system where payment is exchanged for your goods and services, but it can also be your inventory control system, your scheduling system and even your accounts receivable system.

The more integrated it is to your day-to-day operations, the more mission-critical it is to choose the best one for you and your business. Let Wind River Financial help you through the confusion of middleware, gateway connectivity and integrating your POS systems with our credit card processing engine.

There are many specialty providers that can provide you with the features and functionality unique to your environment. However, not all are looking out for your best interests when it comes to the integrated credit card processing they provide. Some will lock you into an ever-increasing pricing scheme just to use their "low cost" POS solution. Don't be fooled.

Let Wind River Financial help you in your search for the best POS or ERP software for your business that is also integrated with our flexibility and service. Not only can we help you with your retail, restaurant or hospitality systems, but we also support merchants in many other industries like healthcare, veterinary services, insurance, manufacturing, business-to-business sales and more.

Don't wait, let our experienced staff help you through the clutter. Call Wind River Financial at 1-800-704-7253 today!
